

# EH75

## Electric Breakers

**WACKER  
NEUSON**  
*all it takes!*

### The highest demolition power in its performance class: EH 75

With its 75 joules of single stroke impact energy and only 25 kilograms of weight, the EH 75 electric demolition hammer by Wacker Neuson is unique on the market. Pleasantly light, but powerful in use, it also impresses with its shockwave-optimized, hollow piston percussion system and an asynchronous motor with a carbon brush-free drive. And thanks to its efficient full hood spring mounting, it also offers excellent vibration damping for low hand-arm vibrations. The re-greasing interval was re-tuned and is 30 hours. This saves time and money.

- 75 joules of single stroke impact energy
- 25 kg operating weight
- 4.8 m/s<sup>2</sup> hand-arm vibrations\*
- Built-in converter protects against drops and peaks in the mains supply
- Optimized percussion system

## EH75 Technical specifications

### EH75

L x W x H	906 x 590 x 238 mm
Weight	26 kg
Percussion rate	1300 1/min
Single stroke energy	75 J (mkp)
Engine / Motor	Three-phase current asynchronous motor with frequency converter for AC connected in series, double insulated
Voltage 1 ~	230 V
Frequency	50 Hz
Current	15.3 A
Power	2.5 kW
Percussion system	Pneumatic spring percussion system

Please note: that product availability can vary from country to country. It is possible that information / products may not be available in your country. More detailed information on engine power can be found in the operator's manual; the stated power may vary due to specific operating conditions. Subject to alterations and errors excepted. Applicable also to illustrations.
